Objective

Seeking a front-end web development position, preferably with some remote work.

Work Experience

Front-end Web Developer

6/2013 – Present | Auto Europe, Portland, ME

- Javascript and CSS architecture, using version control and Gulp packages to organize, concatenate and minify files.
- UI development and design.
- Customized use of various JavaScript libraries for complex site data.
- Troubleshooting and debugging of our older front-end codebase.
- JavaScript and ColdFusion Development for the Mura CMS.

Front-end Web Developer

2/2012 – 11/2012 | Country Home Products, Vergennes, VT

- Maintenance and development for the company's website. Since most of our customers are older users, all JavaScript and CSS needed to be workable in pre-9 versions of Internet Explorer.

Front-end Web Developer

2/2011 – 2/2012 | Colonial Life, Columbia, SC

- Ongoing development for the pre-existing intranet and the new CMS.
- Front-end Development for the new Sitecore CMS to be launched in 2012, including jQuery solutions and XSLT renderings for the CMS.

Graphic Designer, Content Administrator, Candy Photographer

6/2010 – 2/2011 | Candy.com, Weymouth, MA

- Performed content editing an maintenance for the company CMS.
- Designed marketing materials, designed and launched HTML mass emails to subscribers.
- Photographed candy products for use in the company's online store.

Web Consultant

1/2010 – 5/2010 | Spin 350, Boston, MA

- Migrated BIDMC's internal site to a new Sitecore CMS.
- Extensive HTML work was performed to restructure the old content to fit the new design.
- Managed content through the Sitecore, and through Sitecore's Media Library.

Web and Database Designer, Digital Printer Operator

9/2006 – 3/2009 | Full-Time Staff, College of Charleston, Charleston, SC

- Built and maintained departmental sites for the Department of Business and Auxiliary Services, including the *Parking Department*, the *Copy Center* and *Cougar Card Services*. Maintained current web standards, working in conjunction with the I.T. and Marketing departments to ensure brand consistency with other departmental sites.
- Built a Microsoft Access database application to track inventory and revenue for the College of Charleston Copy Center.

Skills

Web Applications and Code

- JavaScript (including jQuery, Underscore and other libraries)
- React
- HTML5, CSS, Sass/LESS
- Responsive Design
- Wordpress with some PHP
- ColdFusion
- Familiar with the Mura CMS and its development requirements
- JSON, XML and XSLT

Adobe Creative Suite

- Photoshop
- Illustrator

Education

Self-Education

1998- Present

- Like most web developers, I learned most of my skills on my own time, outside of work. It's not just something I do for the job. I learn for fun. I can always be found with a tech manual of some kind.

Courses Taken to Update Skills

1/2004 - 1/2007, Trident Technical College, North Charleston, SC

- Various courses taken in web programming and visual design. They didn't have a web development program, but they did offer some design classes and one or two programming classes.

Associate Degree in Commercial Graphics

12/1998, Midlands Technical College, Columbia, SC

- I was trained to run a printing press as well as design for one. Print and Web are total opposites in some ways, but they do have some overlap.
