Objective

Seeking web-oriented employment in Burlington, Vermont.

Work Experience

Front-end Web Developer

2/2011 – Present | Colonial Life, Columbia, SC

- Maintenance and development for the pre-existing internal company site. This includes installing site-wide site index, and extensive use of jQuery and XSLT while maintaining proper web standards.
- Front-end and back-end Development for the new Sitecore CMS to be launched in 2012, including jQuery solutions and XSLT renderings for the CMS itself.
- Worked with development teams to build company web applications, writing the front-end code and developing a set of standards for all future internal web applications.
- Ongoing development for the pre-existing site and the new CMS.

Graphic Designer, Content Administrator, Candy Photographer

6/2010 – 2/2011 | Candy.com, Weymouth, MA

- Performed content maintenance, editing product information, organizing categories and other tasks related to organization and performance of the CMS
- Designed web banners, advertisements and other marketing materials.
- Designed and launched HTML emails to a subscriber list.
- Photographed candy products for use in the online store.

Web Consultant

1/2010 – 5/2010 | Spin 350, Boston, MA

- Migrated BIDMC's internal site to a new Sitecore CMS.
- Extensive HTML work was performed to restructure the old content to fit the CMS design.
- Managed content through the CMS, and through the Sitecore Media Library.

Production Manager

6/2009 – 12/2009 | Hard Copy, Burlington, VT

- Part of a two-man team which handled production in a small, locally-owned copy shop.
- Scheduled and produced various printing orders, from booklets to large format banners.

Web and Database Designer, Digital Printer Operator

9/2006 – 3/2009 | Full-Time Staff, College of Charleston, Charleston, SC

- Built and maintained departmental intranets for the Department of Business and Auxiliary Services, including the *Parking Department*, the *Copy Center* and *Cougar Card Services*. Maintained current web standards, working in conjunction with the I.T. and Marketing departments to ensure brand consistency with other departmental sites. Wrote HTML, CSS and Javascript for each site, and met with department directors to plan new content.
- Built a Microsoft Access database application to track inventory and revenue for the College of Charleston Copy Center. Visual Basic Script was used for database operations, and to control forms and reports. (All created from scratch.) Although VBA has different syntax from Javascript, certain concepts are similar, and the database queries are very similar to those used with MySQL.
- Operated industrial copiers and other equipment at the College of Charleston Copy Center. Due to my background in printing, I was often asked for assistance when production was heavy.

Night Computer Operator

1/2005 - 8/2007 | Coburg Dairy, North Charleston, SC

- Worked with an AS-400 database to coordinate nightly transmission of product orders from all over South Carolina.
- Performed daily maintenance, ran backups, corrected data as needed.
